PROFESSIONAL SUMMARY

Senior Data Engineer and Business Intelligence professional with 17+ years of experience specializing in data warehouse architecture, ETL development, and business intelligence solutions. Proven track record in implementing end-to-end data solutions, managing cross-functional teams, and delivering actionable insights through advanced analytics and visualization platforms.

PROFESSIONAL EXPERIENCE

Lead Technical | Daya Solusi Integra

January 2026 - Present

Developed a comprehensive Internal Control over Financial Reporting (ICOFR) software application, streamlining financial compliance and auditing processes. Architected the full-stack solution using React, Vite, and TypeScript for the frontend, coupled with Hono and Drizzle ORM on a PostgreSQL backend to ensure high performance and data integrity.

Freelance Consultant | IESR (Institute of Essential Services Reform)

August 2025 - January 2026

Developed a custom ETL / Document Management using Azure Static Web (Frontend), Azure Web Services (Backend), Azure Blob Storage (Document Storage), Azure Cosmos DB, where user can upload Excel files (multiple formats) then the data will be uploaded the a single container, view the data using custom built dashboard, and retrieve the data using custom built API.

Data Engineer | Upwork, USA (Remote)

July 2015 - December 2025

Developed and optimized complex SSIS packages for large-scale data migration from legacy SQL Server databases to Azure SQL, reducing processing time by 25% while streamlining data integration workflows and improving data consistency.

Architected and implemented an end-to-end real estate lead generation system utilizing Python-based web scraping and ETL pipelines

Developed machine learning models for house price prediction using historical real estate data

Designed and implemented a scalable data warehouse architecture using PostgreSQL in AWS RDS, integrating with Apache Airflow & dbt in AWS MWAA for automated ETL workflows

Built interactive dashboards using Metabase for analytics and reporting

Designed scalable data visualization solutions integrating multiple data sources for seamless client access
Built end-to-end data pipelines supporting automated dashboard updates and reporting
Provided technical consultation on dashboard implementation and best practices to development teams

Datawarehouse Supervisor | Smartfren, Jakarta

May 2012 - July 2015

Led a team of 2 IT Datawarehouse staff, providing technical guidance and mentorship

Spearheaded the successful migration of enterprise reporting systems from Business Objects XI to Cognos 8

Implemented data governance practices and optimized ETL processes, reducing data processing time by 40%

Collaborated with business stakeholders to translate requirements into technical specifications and deliver custom reporting solutions

Managed end-to-end data warehouse operations, ensuring 99.9% system availability

IT Datawarehouse Staff | Smart Telecom, Jakarta

August 2007 - May 2012

Developed and maintained custom reports using Business Objects 6.5, serving 100+ users across the organization

Designed and implemented ETL processes using PL/SQL for Oracle 10g environment

Successfully migrated legacy Oracle Form reports to Business Objects 6.5, improving report accessibility and user experience

Optimized database queries and stored procedures, resulting in 30% improvement in report generation time

Junior IT Consultant | PT Visi Solusi Teknologi, Jakarta

March 2006 - August 2007

Implemented web-based performance management system (SPAMK) for Bank Indonesia using ASP.NET and QPR 7.4

Developed ETL solutions using PL-SQL (Oracle 9i) for PT Antam Tbk's production data warehouse

Designed and implemented star schema data models and ETL workflows using Ascential DataStage for PT Badak LNG

Created business intelligence reports using Business Objects XI for executive decision-making

TECHNICAL SKILLS

Data Warehousing: Microsoft SQL Server, Oracle, Star Schema Modeling

Business Intelligence: Power BI, Tableau, Business Objects, Cognos, Metabase

ETL Tools: Apache Airflow, Airbyte, DataStage, ODI, SSIS, Informatica, Talend, dbt

Programming: Python, SQL, PL/SQL, Unix bash, Shell scripting

Databases: PostgreSQL, MySQL, Oracle

Cloud Platforms: AWS, Google Cloud

Web Technologies: ASP.NET

EDUCATION

Bachelor's Degree | Institut Teknologi Bandung, Bandung, Indonesia

Graduated March 2006
